The 2010 orthophotography used to produce this map has a ground resolution of 1 meter (3.3 feet) per image pixel. Additional GIS data displayed includes major intersections, US routes, state routes, streets, rivers, evenings, airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and transportation are labeled. The location and shape of features in the GIS layers may not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates.

DATA SOURCES

ORTHOPHOTOGRAPHY: Imagery compiled by Photogrammetry Inc. and published by the DEP Office of Land Use Planning.
BASE MAP DATA: All data is based on USGS 1:10000 scale and displays geographic names, places and their symbols. Some locations, addresses, and facilities. Base map data is neither current nor complete. Street data is based on Telocodes copyrighted data.
MAPS AND DIGITAL DATA: Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital template data sheets on this map.
