This map displays 2010 natural color orthophotography covering areas of coastal Connecticut within 1000 feet of the shoreline and navigable tidal wetlands, all offshore islands, and the Connecticut River to the Massachusetts state line. The data was collected between June 15th and 19th, 2010, when the tidal stage was ½ hour of the predicted low tide, since it was collected during the growing season, the data is subject to potential seasonal vegetation obscures some ground features. The 2010 orthophotography used to produce this map has a gridded resolution of 1 foot (30.48 meters) per image pixel. Additional GIS data displayed includes major interstate, US routes, state routes, streams, ferry crossings, airports, hospitals, educational facilities, rail stations, and town boundaries. Important geographic locations and transportation are labeled. The location and shape of features in the GIS layers may not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates.

DATA SOURCES
ORTHOPHOTOGRAPHY - Imagery compiled by Planet/Imagery, Inc. and published by the DEP Office of Coastal Programs.
BASE MAP/DATA - All data is based on 1:50,000 scale and displays geographic features, places and their symbols, town boundaries, airports, and railroads. Base map data is neither current nor complete. Street data is based on TeleAtlas copyrighted data.
MAPS AND DIGITAL DATA: Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital shapefile data shown on this map.

EXPLANATION
Map prepared by CT DEP, April 2011. Map is not法定. Protect data rights and credits.
