2010 Color Infrared Orthophoto
Beacon Falls, CT

EXPLANATION
This map displays 2010 National Agricultural Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a color infrared, leaf on, 3.79 foot (1 meter) aerial survey taken during the Spring of 2010. The infrared orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification and mapping of habitat areas. The statewide mosaic is 30-maps and single-angle airborne images were generated to produce the input images. The location and shape of features in other GIS layers will not exactly match the actual orthophotography primarily due to differences in spatial accuracy and data collection dates. Smaller-scale data such as major arteries, US routes, state roads, streams, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, educational facilities, main station, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic features, places and their symbols, town boundaries, airports, and railroads. Base map data is neither current nor complete. Street data is based on Tele Atlas's proprietary data.

Map prepared by CT DEP, January 2011.
Map is not colorfast. Protect from light and moisture.
