This map displays 2010 National Agriculture Imagery Program (NAIP) digital orthophotography for the State of Connecticut. It is a color infrared, full-color, 0.39 hip (3 meter) aerial survey taken during the Spring of 2010. This aerial orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification and mapping of habitat areas. The orthophotography is georeferenced to a local coordinate system and input images are not corrected for differences in the range and intensity of colors depending on the area viewed. The location and displays of features in other GIS layers will not exactly match the aerial photography primarily due to differences in spatial accuracy and data collection dates. Some-level data such as major mountains, US routes, state routes, minor roads, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are landmarks, educational facilities, main roads, and some boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
IMAGE PRODUCTS - National Agricultural Imagery Program, (NAIP), is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program, (NAIP), is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
NAIP AND IMAGE PRODUCTS - Used for the CT DEP website to download the base map digital orthophoto data shown on this map.
