This map displays 2010 National Agriculture Imagery Program (NAIP) aerial orthophotography for the State of Connecticut. It is full color infrared, leaf on, 3.39 foot (1 meter) aerial survey taken during the Spring of 2010. The NAIP orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification and mapping of habitat areas. The statewide scale aligns with the statewide digital address database. Each NAIP orthophotography image is not corrected so differences are present in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA’s Farm Service Agency through the Federal Geographic Data Committee (FGDC).

BASE MAP DATA - Includes all data and displays geographic names, places and their attributes, town boundaries, towns, and roads. Base map data is not current or complete. Street data is based on TeleAtlas copyrighted data.

MAPS AND DIGITAL DATA - Visit the CT DEP website to download the base map digital data shown on this map.
