This map displays 2010 National Agriculture Imagery Program (NAIP) aerial orthophotography for the State of Connecticut. It is a color infrared, last on, 3.39 foot (1 meter) aerial survey taken during the Spring of 2010. This aerial orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification and mapping of habitat areas. The statewide data is a result of cooperative efforts between the USDA-National Agricultural Imagery Program and the Connecticut Department of Agriculture.

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the United States Geological Survey (USGS) through the National Agricultural Imagery Program (NAIP) in 2010.

BASE MAP DATA - All data is based on 1:24,000-scale and displays geographic features, places and their symbols, water boundaries, county and sub-county. Base map data is considered current and complete. Street data is based on TeleAtlas copyrighted data.

NAIP AND BASE DATA - Visit the USGS website to download the base map digital data shown on this map.

DATA SOURCES

EXPLANATION

This map is for information purposes only. The shape and size of features in other GIS layers will not match exactly any information shown in the aerial orthophotography primarily due to differences in spatial accuracy and data collection dates. Smaller level data such as major waterbodies, 1/5 square, state rivers, airports, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are numerous hospitals, educational facilities, mass transit, and water boundaries. Important geographic locations and waterbodies are labeled.

Map prepared by CT DEP, January 2011. Map is not current. Protection level 7 (B) and exceptions.
