This map displays 2010 National Agricultural Imagery Program (NAIP) orthoimagery (for the State of Connecticut) as a color infrared, less 1.37 foot (1 meter) cadastral surveys taken during the Spring of 2010. The NAIP orthoimagery provides multi-resolution, such as observing drop and register conditions as well as supporting identification and mapping of habitat areas. The statewide orthoimagery, which is not corrected or processed any present in the range and intensity of colors depending on the area revised. The location and shape of features to other GIS layers will not exactly match information shown to the accuracy primarily, due to differences in spatial accuracy and data collection dates. Street-level sites such as major interstates, U.S. routes, state routes, streets, railways, and ferry crossings are displayed but may not match the locations of such features on the orthoimagery. Also shown are hospitals, educational facilities, main roads, and more boundaries. Important geographic locations and waterbodies are labeled.

**DATA SOURCES**

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA Farm Service Agency through the State Photographic Field Office in New London, CT.

BASE MAP DATA: All data is based on 1:24,000 scale and displays geographic names, plats, and their coordinates (Household, segments, images, and symbols). Base map data is neither accurate, nor complete. Street data is based on Tractor-supplied data.

MAP AND DIGITAL DATA - Visit our CT DEP website for a map and a variety of other in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
