EXPLANATION

This map displays 2010 National Agriculture Imagery Program (NAIP) aerial orthophotography for the State of Connecticut. It is a color infrared, leaf on, 3.39 foot (1 meter) aerial survey taken during the Spring of 2010. This aerial orthophotography provides many services, such as observing crop and vegetation condition as well as supporting identification and mapping of habitat areas. The location and shape of features in other GIS layers will not exactly match the orthophotography primarily due to differences in spatial accuracy and data collection dates. Stream-level data such as major streams, 1/8 miles, state rivers, streams, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are hospital, educational facilities, main stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the Department of Agriculture's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

BASE MAP DATA - All data is based on the 2010 Census and displays geographic names, places and their symbols, county boundaries, properties, and railroads. Base map data is not intended to meet cartographic or mapping standards. Visit the U.S. Government's Federal Geographic Data Committee at https://fgdc.gov to locate data for your area.
