This map displays 2010 National Agriculture Imagery Program (NAIP) aerial orthophotography for the State of Connecticut. It is a color infrared, leaf on, 3.39 foot (1 meter) aerial survey taken during the Spring of 2010. This aerial orthophotography provides many services, such as observing drop and regulation conditions as well as supporting identification and mapping of habitat areas. The statewide coverage of this dataset provided through the NAIP—Aerial Orthophotography Program (AOAP). The input imagery is not corrected for differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as roads, businesses, U.S. routes, state routes, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are labeled important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the NAIP-Ortho Program (NAIP-ORP) in 2010.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, physiographic, geologic, and topographic boundaries. Important geographic locations and waterbodies are labeled.

Map prepared by CT DEP, January 2011. Map is not certified. Protect Land: Build a Future.
