2010 Color Infrared Orthophoto
Easton, CT (North)

EXPLANATION
This map displays 2010 National Agriculture Imagery Program (NAIP) infrared orthophotography for the State of Connecticut. It is a color infrared, false on, 3.39 foot (1 meter) aerial survey taken during the Spring of 2010. This infrared orthophotography provides many services, such as observing crop and vegetation condition as well as supporting identification and mapping of habitat areas. The statewide data product is a composite of multiple aerial surveys. The input images is not corrected for differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Smaller-scale data such as major streams, U.S. routes, state routes, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are hospitals, educational facilities, main station, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA’s Farm Service Agency through the Joint Photomapper Project Office in North Dakota.
BASE MAP DATA - All data is based on U.S.GS 7.5" series and displays geographic names, photos and their symbols, town boundaries, rivers, and roads. Base map data is neither complete nor complete. Street data is based on Esri/TeleAtlas copyrighted data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
