EXPLANATION

This map displays 2010 National Agriculture Imagery Program (NAIP) infrared orthophotography for the State of Connecticut. It is a color infrared, false color image taken during the Spring of 2010. This infrared orthophotography provides many services, such as observing crop and vegetation condition as well as supporting identification and mapping of habitat areas. The orthophotography is a combination of aerial photography and digital input images is not corrected to these differences are present in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match the information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Smaller level data such as major intersections, US routes, state routes, rivers, roads, and lines are displayed but may not match the geographic names, places and boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY: National Agriculture Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the National Photographic Facilities Center in Stillwater, OK.

BASE MAP DATA: All data is based on 1:24,000 scale and displays geographic names, places and their boundaries, town boundaries, rivers and roads. This map data is neither current nor complete. Street data is based off TeleAtlas copyrighted data.

MAP AND DIGITAL DATA: The CT DEP logo is the map and a variety of colors are depicted. The map is not suitable for legal or technical purposes.

Map prepared by CT DEP, January 2011. Map is not suitable for legal or technical purposes.
