This map displays 2010 National Agriculture Imagery Program (NAIP) infrared orthophotography for the State of Connecticut. It is a color infrared, leaf-on, 3.39-foot (1 meter) aerial survey taken during the Spring of 2010. The infrared orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification and mapping of habitat areas. The infrared image is not corrected for differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state roads, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are hospitals, educational facilities, main roads, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the Remote Sensing Field Office in Westlake, OH.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and roads, state boundaries, county, and city. This map data is neither current nor complete. Street data is based on TeleAtlas copyrighted data.
AG AND ENVIRONMENT DATA - Visit the CT DEP website to download the base map digital orthophoto data or this map.
