This map displays 2010 National Agriculture Imagery Program (NAIP) infrared-orthophotography for the State of Connecticut. It is a color infrared, leaf on, 3.39-foot (1 meter) aerial survey taken during the Spring of 2010. The infrared-orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification and mapping of habitat areas. The statewide infrared orthophotography is provided by the USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as centerlines, 1/8-inch scale roads, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - All data is based on 2000-current and displays geographic names, places and their symbols, town boundaries, airports, and railroads. Base map data is neither current nor complete. Street data is based on TeleAtlas copyrighted data.

EXPLANATION
Map prepared by CT DEP, January 2011. Map is not colorfast. Protect from light and moisture.
