

2010 Color Infrared Orthophoto Danbury, CT (Northwest)

EXPLANATION

(NAIP) infrared orthophotography for the State of Connecticut. It is a color infrared, leaf on, 3.39 feet (1 meter) aerial survey taken during the Spring of 2010. This infrared orthophotography provides many data such as major interstates, US routes, state routes, streets, services, such as observing crop and vegetation conditions as well as supporting identification and mapping of habitat areas. The statewide mosaic is not color balanced so tonal imbalances between individual airports, hospitals, educational facilities, train stations, and town input images is not corrected so differences are present in the range and intensity of colors depending on the area viewed. The location labeled.

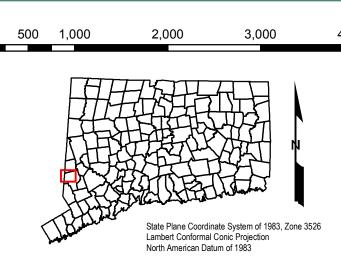

This map displays 2010 National Agriculture Imagery Program and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level boundaries. Important geographic locations and waterbodies are

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program, (NAIP), is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
