EXPLANATION

This map displays 2010 National Agriculture Imagery Program (NAIP) infrared orthophotography for the State of Connecticut. This infrared orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting/identifications and mapping of habitats. The orthophotography is a digital image mosaic of the area that has been color corrected. Image mosaics are color corrected so differences are present in the range and intensity of colors depending on the area viewed. The locations and shapes of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, U.S. routes, state routes, railroad, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are hospitals, educational facilities, main stations, and some boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA’s Farm Service Agency through the aerial photography field office in South Dakota.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and boundaries. Important geographic locations and waterbodies are labeled.

MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT ECO website to download this free map digital data shown on this map.
