This map displays 2010 National Agriculture Imagery Program (NAIP) aerial orthophotography for the State of Connecticut. It is a color infrared, false color, 3.39 foot (1 meter) aerial survey taken during the Spring of 2010. This aerial orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting landuse and mapping of habitat area. The raw scanned infrared orthophotography is color corrected to increase the legibility of the images. The intensity of colors depending on the area viewed. The location and shapes of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major intersections, US routes, state routes, culverts, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are hospitals, educational facilities, main stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA’s Farm Service Agency through the aerial photograpy NAIP Office in St. Louis, MO.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, airports and railroads. Base map data is derived from current, non-compliant. Streets data is based on TIGER copyrighted data.

2010 AERIAL DATA - Visit the CT DEP website to download the base map digital aerial data shown on this map.
