This map displays 2010 National Agriculture Imagery Program (NAIP) color infrared orthophotography for the State of Connecticut. It is a color infrared, leaf on, 3.39 feet (1 meter) aerial survey taken during the Spring of 2010. The infrared orthophotography provides much useful information such as observing crop and vegetation conditions as well as differences in spatial accuracy and date collection dates. Street-level data such as major interstates, US routes, state routes, streets, boundaries, urban areas, and waterbodies are shown. Important geographic locations and waterbodies are labeled. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railways, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are hospitals, educational facilities, main stations, and some boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City. BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and boundaries. Important geographic locations and waterbodies are labeled. Services, such as observing crop and vegetation conditions as well as differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, boundaries, urban areas, and waterbodies are shown. Important geographic locations and waterbodies are labeled. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and date collection dates. Street-level data such as major interstates, US routes, state routes, streets, boundaries, urban areas, and waterbodies are shown. Important geographic locations and waterbodies are labeled.
