This map displays 2010 National Agriculture Imagery Program (NAIP) infrared orthophotography for the State of Connecticut. It is a color infrared, 3.39 feet (1 meter) aerial survey taken during the Spring of 2010. The infrared orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification and mapping of habitat areas. The statewide imagery provides important geographic locations and waterbodies are labeled.

Important geographic locations and waterbodies are labeled. Street data is based on TeleAtlas copyrighted data. Street data is neither current nor complete. Street data is based on TeleAtlas copyrighted data. Important geographic locations and waterbodies are labeled.

The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Smaller-scale data, such as major interstate, US routes, state routes, cities, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

Map prepared by CT DEP, January 2011.
