The map displays 2010 National Agriculture Imagery Program (NAIP) aerial orthophotography for the State of Connecticut. It is a color infrared, leaf on, 3.39 feet (1 meter) aerial survey taken during the Spring of 2010. This aerial orthophotography provides many services, such as observing crop and registration conditions as well as supporting classifications and mapping of habitat areas. The statewide coverage is approximately 1 foot (0.3 meter) resolution. The full resolution input images are not corrected so differences are present in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Smaller-scale data such as major rivers, state parks, airport, roads, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are railroads, airports, educational facilities, manufacturing, and state boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY: National Agriculture Imagery Program, (NAIP), is provided by the USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA: All data is based on 1:24,000 scale and displays geographic names, places and their symbols, some boundaries, airports, and railroads. Base map data is neither current nor complete. Street data is based on Tele Atlas copyrighted data.

Map prepared by CT DEP, January 2011. Map is not suitable for survey or legal use.
