This map displays 2010 National Agriculture Imagery Program (NAIP) aerial orthophotography for the State of Connecticut. It is a color infrared, leaf on, 3.39 foot (1 meter) aerial survey taken during the Spring of 2010. This aerial orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification and mapping of habitat areas. The outside edge of the photograph is not colorfast. This orthophotography is not intended for legal purposes.

The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as name information, U.S. routes, state routes, streams, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, rail stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA Farm Service Agency through the Federal Photogrammetry Field Office in St. Louis, Mo.
BASE MAP DATA - All data is based on U.S. Census and displays geographic names, places and their symbols, county boundaries, airports, and railroads. Road map data is not intended for legal purposes.
MANO-AND-SIZED DATA - Vector GIS data related to the map and a variety of other in PDF format. Visit the CT DEP website to download the base map digital data shown on this map.

Map prepared by CT DEP, January 2011. Map is not colorfast. Project by NFFL and commission.
