2010 Color Infrared Orthophoto
West Haven, CT

EXPLANATION
This map displays 2010 National Agriculture Imagery Program (NAIIP) aerial orthophotography for the State of Connecticut. It is a color infrared, false color, aerial orthophotograph taken during the Spring of 2010. This aerial orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification and mapping of habitats. The statewide orthophotography project was initiated to provide a tool for state and federal agencies, municipalities, and businesses to map Connecticut. The orthophotography map is intended for use as a base map for the Connecticut Map Framework. The location and shape of features in other GIS layers will not exactly match information shown on the aerial photography primarily due to differences in spatial accuracy and data collection dates. Smaller level data such as major structures, 1:5000 scale roads, waterbodies, railroads, and ferry crossings are displayed but may not match the locations of each feature on the orthophotography. Also shown are locations of important geographic locations and waterbodies. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA Farm Service Agency through the Aerial Photography Field Office in St. Louis, MO.
BASE MAP DATA - All data is based on 1:24,000 scale and depicts geographic names, places and their symbols, town boundaries, airports, and railroads. Base map data is neither current nor complete. Street data is not based on 1:24,000 or larger scale data.
MAN-MADE AND DIGITAL DATA - Visit the CT DEP website for more information and a variety of other data.

Map prepared by CT DEP, January 2011. Map is not certified. Protect from light and moisture.
