This map displays 2012 National Agricultural Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a normal color, false on, 5.79 feet (1 meter) aerial survey taken in the Summer of 2012. The summertime season is not color balanced so color imbalance between individual input images is not corrected. This will result in differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries.

Important geographic locations and waterbodies are labeled. Streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USGS (U.S. Geological Survey) through the aerial photograph field office in Salem, Ohio.
BASE MAP DATA - Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps, published formerly, digital, vector, and geographic data layers. Important geographic locations and town boundaries are labeled.地形地物、道路、铁路、渡轮穿越等地表特征在图层之间可能不完全匹配。
