This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false on, 5.79 feet (1 meter) aerial survey taken in the Summer of 2012. The orthophoto mosaic is not color balanced so tonal imbalances between individual input image is not corrected. This will mean differences in the image and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, main streets, railroads, and ferry crossings are displayed on the orthophotography. Also shown are airports, hospitals, educational facilities, main streets, and town boundaries. Important geographic locations and treefarms are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA in FourSquare Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - Based on data originally from the 1:24,000 scale USGS 7.5-minute topographic map products published historically. 1997 and 2007. It includes political boundaries, roads, and other geographic data. 1:24,000 scale. Smaller-scale data may be more complete.
