This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 1.59 foot (1 meter) aerial survey taken in the Summer of 2012. The resulting mosaic is not color balanced so visual differences between individual input images are not corrected. This will cause differences in the shade and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and transect lines are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA Forest Service Office through the National Agricultural Imagery Program. The orthophotography is provided by eTopeka at http://www.topeka.com.
BASE MAP DATA - Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1990 and 2000. This data includes political boundaries, railroads, airports, geographic names, and geographic places. Railroad and road names are from Title 43 "Maps and Digital Data" of the CT DEEP website. All data is subject to errors, omissions, and changes over time.

MAPS AND DIGITAL DATA - Visit the CT DEEP website for the map and a variety of other resources. Visit the CT DEEP website to download the free map digital orthophoto data for this map.
