2012 Color Orthophoto
Colebrook, CT
(East)

EXPLANATION
This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 5.79 feet (1 meter) pixel size aerial imagery taken in the Summer of 2012. The natural color means the surface colors are not corrected. This will cause differences in the tone and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, main streets, streets, railways, and ferry crossings are displayed. It may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1950 and 1975. Includes FBI and FBI railroades, railroades, airports, geographic names and geographic locations. Base data is from Title 11, Section 11, Section 116, Section 1166, Section 11666, Section 116666, Section 1166666, Section 11666666, Section 116666666.
