This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a normal color, false color, 5.79 feet (1 meter) aerial survey taken in the Summer of 2012. The multispectral image is not color balanced so tonal variations between individual input images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection date. Street-level data such as major intersections, US routes, state routes, streets, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the USGS, Farm Service Agency through the State Agricultural Field Office in Hartford, CT.
BASE MAP DATA - Based on data originally from 1:12,000 scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 2012. Includes political boundaries, individual report, geographic names and geographic place. Base and raster names are from TIGER/Line™ copyrighted data. Map and data information within these names are owned.
MAPS AND DIGITAL DATA - Visit the CT ECO website for the map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
