This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a
natural color, false color, 0.59 foot (1 meter) aerial survey taken in
the Summer of 2012. The alphanumeric medium is not color
balanced so tonal imbalances between individual input image
are not corrected. This will cause differences in the image and
intensity of colors depending on the area viewed. The location
and shape of features in other GIS layers will not exactly match
information shown in the aerial photography primarily due to
differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, main
streeets, streets, railroads, and ferry enclosures are displayed but
may not match the locations of such features on the
orthophotography. Also shown are airports, hospitals,
educational facilities, main streets, and town boundaries.

Important geographic locations and features are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the
USDA's Farm Service Agency through the National Photographic Field Office in Salt Lake City.

BASE MAP DATA - Based on data originally from the 1:12,000 scale USGS 7.5 minute topographic
quadrange maps published between 1969 and 1992. It includes political boundaries, railroads,
interstates, county, streets and geographic names. Street and rail names are from Tele Atlas
copyrighted data. These map backgrounds are subject to nominal change.

MAPS AND DIGITAL DATA - Visit the CT DEEP website for this map and a variety of others in
EPSG format. Visit the CT DEEP website to download the base map digital spatial data shown on this
map.
