This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a neutral color, false color, 3.79-foot (1-meter) aerial survey taken in the Summer of 2012. This map-tile mosaic is not color balanced so visual impressions between individual input images are not corrected. Minor color differences in the image and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major intersections, US routes, main streets, avenues, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program, NAIP, is provided by the United States Department of Agriculture through the Agricultural Photo Program Office in Beltsville, MD.
BASE MAP DATA - Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1992. It includes political boundaries, railroads, highways, waterbodies, and geographic names. Road and rail names are from TIGER® coastline data. These map information sources are published under copyright.
MAPS AND DIGITAL DATA - Visit the CT DEEP website for the map and a variety of other services in 1:24,000 scale. Visit the CT DEEP website to download the free map digital orthophoto data shown on this map.
