This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a normal color, false on, 5.79 feet (1 meter) aerial survey taken in the Summer of 2012. The multispectral image is not color balanced so true color differences between individual digital images are not common. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection date. Street-level data such as major interstates, U.S. routes, main streets, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, main streets, and town boundaries. Important geographic locations and townships are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA Farm Service Agency through the National Photographic Field Office at Salt Lake City.
BASE MAP DATA - Based on data originally from the 1:24,000 scale U.S. Army Topographic map published between 1975 and 1985. It includes political boundaries, waterbodies, roads and street names are from Saco Arts 2D mapped shaded relief gray scale orthophotography.
MAPS AND DIGITAL DATA - Visit the CT DEEP website for this map and a variety of others in PDF format. Visit the CT DEEP website to download the free map digital spatial data shown on this map.
