This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 3.79 foot (1 meter) aerial survey taken in the Summer of 2012. The essentially monochromatic color is not color balanced so tonal imbalances between individual input images is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection times. Street-level data such as major intersections, US routes, state routes, streets, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and landmarks are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY: National Agricultural Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City. BASE MAP DATA: Based on data entered from 1:24,000 scale USGS Topo maps published between 1969 and 1992. It includes political boundaries, railroads, interstate highways, county and state highways, roads, and rivers. Map Web services are from State Acres® copyrighted data. Base map information within ownership specific domain.

MAPPABLE DATA: Visit the CT DEP website to download the base map digital spatial data shown on this map.
