This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a normal color, false on, 5.79 foot (1 meter) aerial survey taken in the Summer of 2012. The aerial image is not color balanced or tonal imbalances between individual input images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, main streets, avenues, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and landmarks are labeled.

EXPLANATION

DATA SOURCES

ORTHOPHOTOGRAPHY: National Agricultural Imagery Program (NAIP) is provided by the USDA-FSA Farm Service Agency through the National Photographic Information Office in Salt Lake City.

BASE MAP DATA: Based on data originally from the 1:24,000 scale United States Geological Survey quadrangle maps and other sources. 2010 and 2011 includes political boundaries, railroads, airports, geographic names, and geographic places. Roads and named areas are from Title 62A copyrightable data that was updated with newer sources in compilation.
