This map displays 2012 National Agricultural Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a normal color, false on, 5.79 foot (1 meter) aerial survey taken in the Summer of 2012. The aerial orthophotography is not color balanced so tonal differences between individual output image is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, main streets, streets, railroads, and ferry routes are displayed on the orthophotography. Also shown are airports, hospitals, educational facilities, main systems, and town boundaries. Important geographic locations and features are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the National Photographic Field Office in Salt Lake City, Utah.
BASE MAP DATA - Based on data originally from the 1:24,000 scale U.S. Geological Survey topographic maps published between 1990 and 1995. Includes political boundaries, waterbodies, railroads, and other important geographic features. Data is from The Map Resources website, 1990s base map data is copyrighted by the U.S. Bureau of Land Management.
MAPS AND DIGITAL DATA - Visit the CT DEEP website for this map and a variety of other data in .ESR format. Visit the CT DEEP website to download the base map digital orthophoto data shown on this map.

EXPLANATION
