2012 Color Orthophoto
Naugatuck, CT

EXPLANATION
This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotographs for the State of Connecticut. It is a natural color, false color, 5.79 feet (1 meter) aerial survey taken in the Summer of 2012. The orthophotograph is not color balanced so tonal imbalances between individual input images are not corrected. This will cause differences in the shape and intensity of colors depending on the area viewed. Location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection times. Street-level data such as major anticlines, US routes, main streets, streets, railroads, and tree canopies are displayed, but may not match the locations of such features on the orthophotograph. Also shown are airports, hospitals, educational facilities, residential areas, and forest boundaries. Important geographic locations and transportation facilities are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY—National Agricultural Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the National Agricultural Imagery Program Office, in Wall, Idaho.

BASE MAP DATA—Based on data originally from 1:12,000 scale USDA's 7.5 minute topographic quadrangle maps. Attribution: USDA Forest Service.
