2012 Color Orthophoto
New Fairfield, CT

EXPLANATION
This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a normal color, false color, 1:5,790 scale (1 meter) aerial survey taken in the Summer of 2012. The morning mode is not color balanced so color imbalance between individual input images is not corrected. This will result in differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers may not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, main streets, streets, railroads, and ferry routes are displayed at may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and towns are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the NAIP Orthophoto Field Office in Salt Lake City.
BASE MAP DATA - Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1992. It includes political boundaries, railroads, highways, water features, 1 mile quadrangle maps, and others. Additional information includes community names and roads.

EXPLANATION DATA SOURCES
Important geographic locations and waterbodies are labeled.

DIFFERENCES IN SPATIAL ACCURACY AND DATA COLLECTION DATES

DATABASES AND DIGITAL DATA
Maps and digital data are available in the CT DEP's ESRI ArcView file geodatabase format. Contact the DEP for additional information and data. Additional information is available at:
