This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a normal color, hard copy of 3.79 foot (1 meter) aerial survey taken in the Summer of 2012. The aerial imagery is not color balanced so tonal similarities between individual input images may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries.

Important geographic locations and waterbodies are labeled. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Airports, geographic names and geographic places. Streets and street names are from Tele Atlas ® copyrighted data. Base map information is neither current nor complete. This will cause differences in the range and shape of features in other GIS layers will not exactly match the base map. Differences in spatial accuracy and data collection dates may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

EXPLANATION

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

BASE MAP DATA - 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1992. Includes political boundaries, railroads, airports, geographic names and geographic places. Streets and street names are from Tele Atlas ® copyrighted data. This map information is neither current nor complete.
