This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a normal color, false color 3.09 foot (1 meter) aerial survey taken in the Summer of 2012. The monochrome mosaic is not color balanced so visual imbalances between individual input images is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

BASE MAP DATA - Based on data originally from 1:24,000-scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1992. It includes political boundaries, railroads, airports, geographic names, and geographic places. Rasters and raster layers are from Title 36 Arc'topeigned data. These map abstractions were ownership  areas.

MAPS AND DIGITAL DATA - Visit the CT DEEP website for this map and a variety of others in PDF format. Visit the CT DEEP website to download the base map digital spatial data shown on this map.
