2012 Color Orthophoto
Cheshire, CT
(North)

EXPLANATION
This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a
natural color, false color, 5.79 foot (1 meter) aerial survey taken in
the Summer of 2012. This statewide mosaic is not color
balanced so visual anomalies between individual input images
are not corrected. This will cause differences in the image and
intensity of colors depending on the area viewed. The location
and shape of features in other GIS layers will not exactly match
information shown in the aerial photography primarily due to
differences in spatial accuracy and data collection dates.
Street-level data such as major interstates, US routes, main
routes, streets, and railroads and five intersections are displayed
and may not match the locations of such features on the
orthophotography. Also shown are airports, hospitals,
educational facilities, main streets, and town boundaries.
Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the
USDA/US Fish & Wildlife Service through the National Photogrammetry Engineering Office in Salt Lake City.
BASE MAP DATA - Based on data originally from 1:24,000 scale USGS 7.5 minute topographic
geographic maps published between 1969 and 1992. Includes political boundaries;
roads; rivers and streams; lakes; major parks and waterbodies; geographic names; and geographic
places. Roads and river names are from Title 15 (NPS) geographic data for mapping waterbodies and
waterbodies with associated events.
MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in
a PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this
map.
