This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 5.79 foot (1 meter) aerial survey taken in the summer of 2012. The erroneous imagery is not color balanced or tonal imbalances between individual input images is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection times. Street-level data such as major interstates, US routes, main routes, streets, railroads, and ferry channels are displayed as they may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USGS through the Connecticut Agricultural Photography Program Office in Southbury, CT.

BASE MAP DATA - Based on data originally from, 1:12,000 scale USGS 7.5 minutes topographic quadrangle maps published between 1940 and 1980. It includes political boundaries, railroads, airports, geographic names and geographic places. Rights and usage terms are from Title 43, US Code "copyrighted works. These map information unless otherwise noted are public domain.

MAPS AND DIGITAL DATA - Visit the CT DEEP website for the map and a variety of others in GIS format. Visit the CT DEEP website to download the free map digital orthophoto data on this map.
