EXPLANATION

This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a normal color, false color, 5.79-foot (1 meter) aerial survey taken in the Summer of 2012. The aerials mean is not color-balanced so visual impressions between individual output images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major arteries, U.S. routes, main streets, avenues, highways, and many cemeteries are displayed, but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USGS National Agricultural Imagery Program through the National Photographic Field Office in Salt Lake City.

BASE MAP DATA - Base map data are from USGS 1:24,000-scale USGS topo quadrangle maps published between 2000 and 2003. It includes principal roads, railroads, airports, geographic names and geographic places. Base and names are from USGS "Topo" projection data and map information within coordinate system.

MAPS AND DIGITAL DATA - Visit the CT DEEP website for this map and a variety of others in 2013 format. Visit the CT DEEP website to download the free map digital data layers shown on this map.
