This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a normalized color, false color, 5.79-foot (1 meter) aerial orthophotography taken in the summer of 2012. The orthophotographic accuracy is not color balanced so color inaccuracies between individual input images is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial orthophotography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed as may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the National Agriculture Imagery Program Office at Salt Lake City.
BASE MAP DATA - Based on data originally from 1:150,000 scale USGS 7.5 minute topographic quadrangle maps published between 1970 and 1980. It includes federal lands such as national forests, national parks, and state/provincial parks.
MAPPING AND DIGITAL DATA - Visit the CT DEP website for this and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
