This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color 3.39 feet (1 meter) aerial survey taken in the Summer of 2012. This aerial image is not color balanced so tonal imbalances between individual input image is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection times. Street-level data such as major interstate, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and features are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

BASE MAP DATA - Based on data originally from 1:24,000-scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1992. It includes political boundaries, railroads, airports, geographic names and geographic places. Base and aerial images are from Title 43 U.S. Code, the Aerial Photography Act of 1978.

MAPS AND DIGITAL DATA - Visit the CT DEP website to download the free map digital spatial data shown on this map.

EXPLANATION

This is a photograph taken from an airplane. The photograph is a true color image of the area. The colors in the photograph are based on the natural color of the area. The photograph is not color balanced so there may be differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match the locations of such features on the aerial photography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and features are labeled.
