This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is in a natural color, false color, S/10 foot (1 meter) aerial survey taken in the Summer of 2012. The radiometric image is not color balanced so tonal imbalances between individual output images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS maps will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major intersections, US routes, main routes, streets, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, main streets, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP), is provided by the USGS of the Forest Service through the National Agricultural Imagery Field Office in Falls Church, VA.
BASE MAP DATA - Based on data originally from 1:24,000-scale USGS TanDEM-X topographic quadrangle maps published following 1992 and 1998. This includes political boundaries, railroads, airports, geographic names and geographic places. Derived and base names are from Title IIA "Orthophoto" entries. These map interpretations include conventional cadastral, political, water, and other map data information salute interpretation completion.

MAPS AND DIGITAL DATA - Visit the CT DEEP website for the map and a variety of others in PDF form. Visit the CT DEEP website to download the free map digital spatial data shown on this map.
