This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the Town of Sherman, Connecticut. It is a natural color, false color, 5.99 foot (1 meter) aerial image taken in the Summer of 2012. The map is not colorfast and color balance or tonal imbalances between individual input images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers may not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, airports, railroads, and ferry crossings are displayed on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and features are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA Farm Service Agency through the National Agricultural Imagery Program Office in Suitland, MD

BASE MAP DATA - Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published by the USGS. 1992 and 1995 National Geographic 7.5 minute quadrangles. Street names and road names are from the 2002 AADT population-based interstates, U.S. routes, state routes, airports, railroads, and ferry crossings. Base and road data are from the USGS 2002 National 7.5 minute quadrangle maps. This orthophotography is subject to occasional omissions.
