This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is in a normal color, face-on, 5.79-foot (1 meter) aerial survey taken in the Summer of 2012. The materials image is not color balanced so visual similarities between individual radar images are not consistent. This will mean differences in the maps and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major arterials, US routes, main name, streets, railroads and ferry crossings are displayed as they may not match the locations of such features on the orthophotographs. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the Regional Photographic Field Office in Plainfield, CT.
BASE MAP DATA - Based on data originally from 1:24,000-scale USGS 7.5 minute topographic quadrangle maps published between 1923 and 1991. It includes political boundaries, waterbodies, rivers and roads names are from Title 25, US Environmental Protection Agency, USGS 1:24,000 quad data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for the map and a variety of others in PDF format. Visit the CT DEP website to download the free map digital orthophoto data shown on this map.
