This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a national color, false on, 5.79 foot (1 meter) aerial survey taken in the Summer of 2012. The multispectral mosaic is not color balanced so tonal variations between individual input image is not corrected. This will cause differences in the image and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and date collection times. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in North Carolina.
BASE MAP DATA - Based on data originally from 1:12,000 scale USGS 7.5 minute topographic quadrangle maps published between 1990 and 2010. Includes printed framework, pipeline, roads, public domain, railroads, and examined non-Federal data. Map data is from TIGER/Line® copyrighted data. These map information displays are considered confidential.
MAPS AND DIGITAL DATA - Visit the CT DEEP website for the map and a variety of other services in 2012 format. Visit the CT DEEP website to download the base map digital orthophoto shown on the map.
