This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a normal color, false on, 5.79 feet (1 meter) aerial survey taken in the Summer of 2012. The aerial image is not color balanced so spatial imbalances between individual input images are not corrected. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are depicted on the orthophotography. Also shown are airports, hospitals, educational facilities, main airports, and town boundaries. Important geographic locations and features are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA National Library of Agriculture through the National Agriculture Imagery Project Office in Rolla, MO.

BASE MAP DATA - Based on data originally from 1:12,000 scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1992. Includes political boundaries, railroads, airports, geographic names, and geographic places.hi and river names are from Title 15, U.S. Code. Other data from data vendors, including oceanic features.

MAPS AND DIGITAL DATA - Visit the CTDEP website for the map and a variety of other maps and data. Our CT SHP software can download this map digital spatial data shown on this map.
