This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a normalized color, true color, 5.79-foot (1 meter) aerial survey taken in the Summer of 2012. The normalized imagery is not color balanced so visual differences between individual input images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match the locations of such features on the orthophotography. Also drawn are airports, highways, educational facilities, train stations, and town boundaries. Important geographic locations and landmarks are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

BASE MAP DATA - Based on data originally from the U.S. Census Bureau, Geographic Names Information System, published annually 1996 and 2006. Includes political boundaries, roads, railroads, geographic names, and geographic places. Roads and railroads are from Title 43, United States Code, and geographic names are from Geographic Names Information System.
