This map displays 2012 National Agricultural Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a near-color, fast-on, 5.79-foot (1 meter) aerial image taken in the Summer of 2012. The resulting mosaic is not color-balanced so tonal imbalances between individual input images are not corrected. This will cause differences in the tone and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotographs. Also shown are airports, geographic names and geographic places. Streets and street names are from Tele Atlas ® orthophotography base map information includes automatic compilation.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA’s Farm Service Agency through the National Agricultural Imagery Program Field Office in Salt Lake City.

BASE MAP DATA - Based on data originally from the 1:2,700 scale U.S.GS series geographic quad published 1979 and 1983, it includes federal boundaries, railroads, airports, geographic names and geographic places. Street and street names are from Tel Atlas ® orthophotography base map information includes automatic compilation.
