This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a color orthophoto taken in the Summer of 2012. The statewide mosaic is not balanced so tonal imbalances between individual input image is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the orthophotography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed as may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the Federal Photographic Dataset Office in Salt Lake City.
BASE MAP DATA - Based on data originally from 1:12,000 scale USGS 7.5 minute topographic quadrangle maps published by the USGS in 1996 and 2007. Includes political boundaries, roads, highways, railroads, rivers, streams, lakes and geographic place names. Street and town names are from Tel Atlas maps and GIS data from the City of Greenwich.

MAPS AND DIGITAL DATA - Visit the CT DEEP website for this map and a variety of others in GIS format. Visit the CT DEEP website to download the free map digital Orthophoto data. January 2013
