This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a "natural color, false color, 0.59 foot (1 meter) aerial survey taken in the Spring of 2012. This statement means that color is not color corrected so that hue and saturation are not balanced so that hues in individual aerial image are as seen in color. This will cause differences in the hue and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, main streets, and town boundaries. Important geographic locations and waterbodies are labeled. This map was produced by the Connecticut Department of Transportation (ConnDOT) and was created using 2012 orthophotography data. The map data was compiled by the University of Tennessee Spatial Analysis Laboratory (UTSAL). The map was created using industry-standard geographic information systems (GIS) software. The Connecticu	

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USGS (U.S. Geological Survey) through the Agricultural Photography Field Office in Salt Lake City, UT.

BASE MAP DATA - Based on data originally from 1:24,000 scale USGS 7.5-minute topographic quadrangle maps published between 1990 and 2005. Includes parcel boundaries, railroads, airports, geographic names and geographic places. Roads and town names are from Title III Acres (1:24,000-scale) orthophoto products. These map products include access to street name changes.

MAPS AND DIGITAL DATA - Visit the CTDOT website for the map and a variety of other tools. Visit the CT DEP website to download the base map digital spatial data shown on this map.
